

MODERN FLUE GAS ANALYSIS

for control and adjustment works at oil- and gas-fired plants

First Step in the ecom Technique

ecom[®]-200

- Infrared interface for external protocol printer
- Condensation trap with fine-dust filter
- Split-leather bag with carrying strap

Handy and Light, made by ecom

ecom[®]-CN

- Infrared interface for external protocol printer
- Automatic CO switch-off
- Position-independent condensation trap with monitoring
- Quick-loading Ni-MH accumulators

NEW

Compact Instrument

ecom[®]-EN

- With integral protocol printer
- 4000 storage locations
- CO purging thru 2nd pump
- Transport bag with probe holding

Flexible Features with Remote Control

ecom[®]-J2K

- Removable control module with radio transmission
- Extendable data memory thanks to Multi-Media-Card's
- Automatic condensation evacuation
- Electronic position monitoring
- Features upgradable

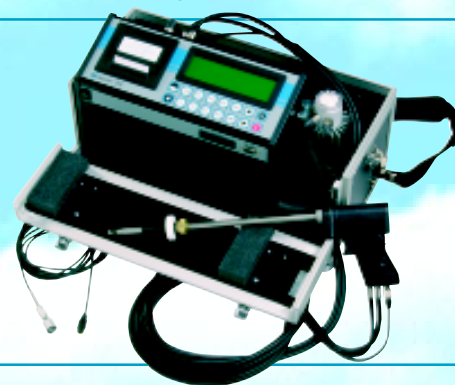

NEW

With Many Operation Safety Features

ecom[®]-JN

- Heated sampling probe for condensation-free soot measurement
- Automatic condensation evacuation
- Instrument heating for safe winter operation
- Separate filter for CO sensor
- Separate fresh air inlet for calibration
- Highly upgradable

For High Measurement Requirements

ecom[®]-KD

- Heating diagnosis operation for weak points determination
- Monitored automatic operation for long-time measurements
- Electric gas cooler for gas drying
- Individually programmable operator key
- Instrument conditioning for high accuracy
- Connection for heated sampling system
- Integral matrix printer

... FURTHER PRODUCTS

TIGHTNESS CHECK SET
ecom®-DPK
for process of:

- Preliminary check
- Main check
- Usability check

at gas networks

GAS DETECTOR
ecom®-GSK
Professional leakage detector

- optical and acoustical warnings
- short response time
- flexible applications thanks to swan neck
